

# Bosch Solution 64

## All you need in home security

### Compatible Accessories

ISM-BLQ1 - Quad PIR Detector. You get two PIR detectors in one unit. For an alarm to be activated, both PIRs must signal an alarm. Regular motion in one part of the room would cause a standard, single PIR detector to alarm repeatedly, using a quad will give you the reliability you need.

ISM-BLD1-P - TriTech® PIR/Microwave Detector. This model combines standard PIR technology with microwave detection technology and advanced signal processing, which provides the best analysis of disturbances. TriTechs also offer pet/animal immunity up to 45kgs, making it the ultimate in motion detection for your business or home.

DS940Q -Quad Passive Infrared Detector. With 13m x 13m coverage, allows for virtually instantaneous response to human intruders without false alarming. Perfect for almost every home.

DS835iT - Pet Immune TriTech with 11m x 11m coverage. Dual Microwave & PIR technologies with pattern recognition technology, mean this detector is perfect for the home, office, warehouses and factories.

DS936 - Low profile ceiling mount passive infrared detector with 7.5m coverage.

RF3212E - 433MHz wireless receiver designed to support Solution Series wireless accessories.

RF3334E - 4 button keyfob transmitter for STAY and AWAY operation as well as in-built panic functions and auxiliary power output control.

CP100 - Slim Line Text Code Pad for system interaction.

### Features

- Integrated access control
- Easy to read code pad
- Easy text menu control
- AWAY & STAY arming modes
- 128 users
- Partitioning to 8 separate areas
- System indicators - AC fail system troubles
- Chime feature on user selectable zones
- Remote arming via the telephone
- Walk test mode
- Alarm memory recall
- Code pad panic and duress
- 2 entry timers
- Remote expansion

### Tradition of Quality and Innovation

For over 100 years, the Bosch name has stood for quality and reliability. Bosch Security Systems proudly offers a wide range of intrusion, access control, CCTV, management and communication systems and components to help you find the solution for any application. We are the global supplier of choice for innovative technology backed by the highest level of service and support. When you need solutions you can rely on, choose Bosch.

# Superior Performance

## Reliability you can trust

### Superior Performance

You've worked hard for the things that you own. Your home is your sanctuary. Should a burglary or other incident occur, the loss is not just the items destroyed or stolen – they can be easily replaced. What you lose is the peace of mind and security that your home one provided. The Solution 64 security system from Bosch Security Systems provides you with the perfect solution. The Solution 64 combines an impressive range of functions, future focused technology, and an ability to adapt to your changing needs and lifestyle. Finding the right security system for your home need not be a complex and time consuming task.

### One Touch Security

The Solution 64 has been designed with your needs in mind. With one simple touch of your code pad, you can:

Arm your system in AWAY mode to provide protection while you're not at home or in STAY mode when you're home but only in one area of the house (ie. Stay upstairs and arm downstairs)  
Activate and deactivate chime mode. This allows you to monitor doors, windows and other devices, keeping track of movements in your home

There are even complete text messages on the code pad display to guide you through the operation of your system.

### Reliability You Can Trust

The Solution Security Panel range has been a market leader for over 20 years. Designed in Australia, they represent thousands of man hours of development using an ongoing process of customer feedback, engineered into systems every year. The result is a tried, tested and continually enhanced system that is built to provide years of trouble-free performance.... What you expect from Bosch.

### Modern & Stylish Code Pad

The Solution 64 has a stylish code pad that will blend into any décor. Available in white or a modern black design, the code pad has the added benefit of a full text display that ensures simplicity when operating your system.

More than 90% of false alarms from security systems are caused by user error. The Solution 64 eliminates many of the causes of false alarms by displaying complete text messages and user prompts on the code pad to guide you in the operation of your system.

### Cost Effective Technology

The Solution 64 is a state-of-the-art security system at an affordable price, engineered by Bosch to provide years of trouble-free service. There is a comprehensive range of Bosch accessories available from your alarm installer that can be configured to provide a cost effective security solution for you and your family. For apartments or difficult installations, a range of wireless sensors can be quickly and easily fitted to your system.

# Burglaries not only cost money but are traumatic!

## Now thanks to Bosch, reliable security needn't cost a fortune

### Easy Arming Option

The Solution 64 code pads are available with an optional proximity reader providing you with the choice of codeless entry. Rather than having to remember your PIN code, simply present your keyring-sized token to the face of the code pad to arm or disarm the system.

Alternatively, the Solution 64 can be programmed to use a wireless remote control that is small enough to fit on your keyring, like your car remote. These remote controls allow you to arm or disarm your home as you leave by pressing one simple button. The wireless remote can also act as a portable panic button, and can even be used to switch on lights or open garage doors.

### Growing With Your Needs

The Solution 64 is expandable to support up to 64 security devices, such as motion sensors, door or window contacts, and smoke detectors. When smoke or intruders are detected, the Solution 64 can set off sirens, send reports to your monitoring centre, and activate lights, providing security you can rely on 24 hours a day.

### Peace of Mind for your Family

Not only will the Solution 64 look after your home, it can give you the peace of mind that your children are safe. Your Solution 64 can send a text message to your mobile phone to let you know that your children have arrived at home safely and have turned off your alarm system.

### User Control

The feature-packed Solution 64 includes automatic arming and single button arming for both AWAY and STAY modes. AWAY mode allows you to arm both the interior and exterior zones when you are leaving the premises. STAY mode allows the system to be armed

protecting the perimeter zones while allowing you to move around inside, without causing annoying false alarms. If an unauthorised person enters through a protected door or window, an alarm can be immediately activated, providing you with peace of mind whether you're at home or away.

This fully automatic self-testing unit allows you to forget the system is there, while knowing you are still protected.
